

Drape Terms & Pricing

BLD D&S is proud to offer a deep inventory of standard event drape as well as a selection of specialty drape. We supply stock as well as installation, and we have developed pricing formulas to make planning and budgeting easy and adaptable to the changeable nature of events.

Labour is inherent in these prices, and trucking is additional. We have minimum flat rates for trucking, (with rights reserved for exceptional circumstances), and these rates can absorb considerable additional decor. We will happily coordinate with other suppliers to reduce your trucking expenses overall.

As well as straight stock drape, there is a wide range of drape treatments available that include swagging, tassels, and architectural configurations that can dramatically enhance and adapt space use. Create intimate spaces, rich perimeter treatments, dynamic service stations, entry treatments, or focal point 'pavilions', and consider colour coordinated fabric swags or lighting effects to maximize drama.

Drape Pricing & Terms

Standard Drape:

We can supply almost unlimited Black Velour or White Sheers due to our inventory and partnerships. Though we own considerable stock in White Velours and Black Sheers, quantities are more limited both in-house and in the Vancouver marketplace.

Tech surround sizes are available as well.

Drape and support hardware is available to rent by piece, or by installed by linear ft.

A minimum of 20' is required to actuate the installed linear ft. price structure, or 10' with additional rentals being installed by BLD D&S. This formula applies only to standard drape stock.

These prices include support hardware and labour, and are based on continuous runs. 'Modules' of 10' or less are priced separately, to account for additional hardware and labour.

Standard Drape:

Black Velour, to 20' h
14 oz; IFR \$16.50/ linear ft. *installed*

Black Velour, 3' - 5'h
(Tech Surround)
